COLLABORATION

- What is it?
- Why do it?
- How to do it?
- Who should do it?
- Designer-course builder communication
- Discussion

WHAT IS TOOLKIT COLLABORATION?

- The ability for the owner/creator of a course to share it privately and securely with other Toolkit users.
- They can have edit or view only access

WHY? TEAMWORK HAS ITS CHALLENGES

- Working with old information, or not enough information, can lead to mistakes e.g. print map errors
- A lot of people need to know about the cross country course

HOW DOES TOOLKIT COLLABORATION HELP?

- People have the course information they need handy
- “It takes out the guesswork” Brett Ryan, course builder
- Single up to date source
- More Secure than emailing a link (need account to access)
- Easy to manage
- Reduce your own workload
